

Dear Alviso Residents,

Valley Water is scheduled to begin dirt hauling to Pond A12 stockpile site this week. Truck hauling hours to Pond A12 will be between 9 a.m. to 3 p.m., Monday through Friday.

Beginning May 7, 2019 through June 14, 2019, the City of San José will resurface Elizabeth Street between Gold Street and El Dorado Street as part of the city's Alviso Pump Station Project. That city work will impact the dirt hauling route to Pond A12. During this period, the route will detour from Gold Street to North Taylor Street to El Dorado Street to Catherine Street and finally to Hope Street.

Once the resurfacing is completed, Valley Water will redirect the dirt hauling route to its original path of Gold Street to Elizabeth Street, then Hope Street to the Alviso Marina County Park entrance.

For more information, contact Public Information Representative Tony Mercado at tmercado@valleywater.org or 408-630-2342.

Sincerely,
Richard P. Santos
Director, District 3
Valley Water
